CORRUGATED TANKS STORAGE SOLUTIONS

A variety of applications for liquid storage tanks.

At GEI Works, providing Liquid Storage Solutions is more than just a phrase for us.

When working with a customer, we consider all of your concerns, restrictions, budgets and requirements. We have a **team of industry experts** available to help solve your liquid storage, filtration and water system project needs.

We primarily deal with the storage tanks themselves, but we can also provide engineering and design on complete systems including pumps, installation, snow-loads, engineering and seismic recommendations.

We thrive on finding innovative ways of meeting the needs of our customers.

We realized long ago that no site or project is created equal. Each has unique conditions, outside factors and underlying goals. For this reason, our company does more than just supply products. We listen. We make sure we **understand the factors** involved so that the storage solution we supply will meet the exact needs and requirements of your project and site.

Call now to discuss your requirements or to get a quote from our storage specialists.
