Light Floating Marker 50

A floating, flashing marker light designed for use with containment and debris booms, turbidity control curtains, or as a marker for anchor lines and other marine based operations.

Built of durable PVC material with overall height of 50" and 26" (typical dimensions) exposed above the water line 6 ft lanyard. The ballast is filled with concrete.

The light is operated by two D cell batteries with a transistorized blinking switch. Controlled by a photo cell that turns the light on at dusk and off at dawn. An attachment loop of cable is provided beneath the float for attachment to boom.

Standard bulb is clear (can also be mounted directly to oil boom or turbidity curtain).

Strobe Light Specifications

Size: 260 x 56mm

Weight: 280g

Visibility: 6km

Battery Alkaline "D" cell: Two

Battery Life: 30days

Flash Rate: 2.5sec

Waterproof: 30m
