

## Self Bailers

Maintain Spill Containment Compliance

### Self Bailers Effective Hydrocarbon Filters

Self Bailers are designed to easily connect to the outflow of sumps and other storage containers to act as a hydrocarbon filter as runoff or water is flowing from the container. The Self Bailer features a manual shutoff valve to secure any draining applications. Larger or concentrated spills activate an auto-shutoff mechanism providing an additional means of security that prevents discharge into the surrounding environment.

# Self Bailers

## Maintain Spill Containment Compliance

Self Bailers are designed to easily connect to the outflow of sumps and other storage containers to act as a hydrocarbon filter as it is flowing from the container. They also feature a flow rate up to 55 gallons per hour.

These Self Bailers feature a convenient, replaceable filter that allows for repeated use and a longer lifespan. Filters for each sized bailer are available in single and dual packs.

These Self Bailers feature a manual shutoff valve to secure any draining applications. Larger or concentrated spills activate auto-shutoff mechanism, featuring an additional means of security in the surrounding environment.

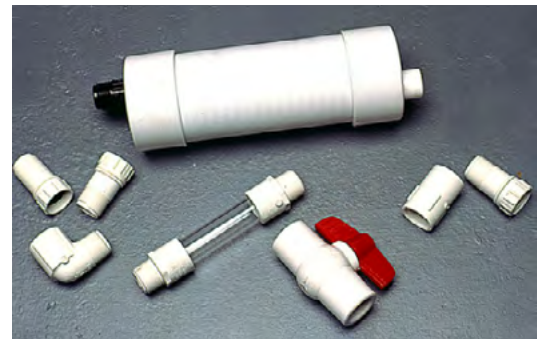

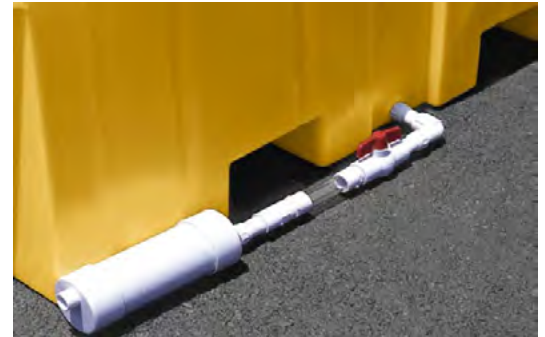

The hydrocarbon filters are ideal for non-monitored sites due to their self-contained design.

### Common applications for these Self Bailers include filtering:

- Rainwater collection tanks
- Containment sumps
- IBC's
- Spill pallets
- Secondary Containment Berms

### Helping you stay compliant

- Connects to Outdoor Containment Products to Filter
- Hydrocarbons out of the Water
- Helps Sites Comply with NPDES, 40 CFR 122.26 (1999) and SPCC Requirements
- Helps Provide Clean Stormwater Runoff
- SWPPP

### Self Bailer Sizes

Sizes	Length/Diameter	Flow Rate
Standard	28" x 3 1/2"	7.5 Gallons/hr
Large	36" x 4 1/2"	22 Gallons/hr
X-Large	39" x 6 1/2"	42 Gallons/hr
XX-Large	43" x 9"	55 Gallons/hr
