

Mini Spill Basin

Small Footprint. Big Impact.

[OX Mini Spill Basins](#) are a quick solution for any site that requires short-term storage of drums, small equipment, paint cans, fuel tanks, or hazmat materials. Designed as a flexible, folding tray, these containment basins pop open in seconds to contain leaks, store equipment or hold a battery.

Mini Spill Basin

Small Footprint. Big Impact.

The [OX Mini Spill Berm](#) is commonly used as a spill tray, secondary containment, storage pallet and a spill- response tool.

It's perfect for holding small tanks and drums that may leak. The berm is also great for temporarily holding items that require containment. This Mini Berm is made of strong, flexible material, with sides held up by fiberglass rods. These features make the berm easy to deploy and roll up again into small size for storage.

The mini berm is one of the best options for secondary containment or spill protection on a small scale with easy accessibility.

Applications
